The Benefits of Grub Control

- ▶ **Pro:** The piece of mine that your lawn will not be damaged from grubs
- ▶ **Pro:** The less likelihood that skunks, opossums, moles, voles and racoons will dig into your lawn looking for grubs. These animals also eat earthworms and may dig into the lawn.
- ▶ **Pro:** Birds will not be tearing up your lawn looking for grubs. Birds also search for earthworms in the lawn so check to make sure grubs are present.
- ▶ **Pro:** Your lawn will not have to be repaired from grubs eating the turf roots of the grass.
- ▶ **Pro:** Grub Control provides excellent protection from the next generation of grubs.
- ▶ **Pro:** Grub Control Preventive products are the most effective.
- ▶ **Pro:** Grub Control Preventive is not as expensive as the curative treatment is and the curative treatment must be watered in right away per Federal law (label is the law).
- ▶ **Pro:** Your lawn will not have any brown sections from grub damage.
- ▶ **Pro:** No spongy soil from grub damage underfoot.
